The low record, which is the lowest since July, would have been still lower but for the descovery of five cases of sickness in one house on St. Bernard Avenue, as the result of the death of the father of the family, without medical attention. He is Leo S. Barrington, an Englishman, and it was found that his wife and four children were all sick. The survivors were taken to the emergency hospital, where two were pronounced positive cases and the others held for observation. The other death was of a hady whose case had been reported as suspicious some days ago. The only two new cases above Canal Street are near that street, so that for the first time since the fever has been under headway the unlown section reports no cases.

News from the country parishes now is principally announcements from the health boards that they will raise the quarantines against New Orleans. October 15th.
